

THERMOCHEM[®]

Position: Thermochem CAD Designer

Description: Thermochem designs and builds highly specialized first of a kind system to continually enhance and expand the capabilities of the Geothermal Industry. At Thermochem CAD designers work closely with engineers, chemists, and technicians to develop raw concepts into refined equipment and complex systems. The range of design work spans everything from miniature ultra-high pressure valves, to multi-ton structural steel fabrications, to turn-key plant chemistry monitoring & modification systems. Thermochem CAD designers are creative, enjoy technically challenging projects, and the energy of a diverse, highly motivated team.

Qualifications: This position is full-time and includes benefits. It is open to applicants with a minimum AA/AS degree or equivalent, and minimum five (5) years applicable work experience.
