

THERMOCHEM[®]

Empowering Energy Industries since 1985

OUR MISSION

To maximize the return on the assets of our clients, by ensuring the most efficient use of their resources and equipment. We strive to provide early detection of potential problems and innovative solutions for sustainable utilization of the resources they have developed.

OUR CORE VALUES

Safety and Environment

Thermochem's highest priority is ensuring the safety of our employees, customers and the communities we serve. While developing and maintaining clean, renewable energy, we are careful to preserve and protect all aspects of the environment.

Quality

Thermochem strives to provide the highest quality services and products in our industry through experience, perseverance and innovation.

Integrity

Integrity permeates every aspect of Thermochem's business and is demonstrated in the honesty and fairness of our relationships with employees, clients and suppliers. Producing accurate, unbiased data and objective interpretations is an inherent value of our work as analytical chemists, scientists and engineers.

Responsiveness

Thermochem endeavors to deliver services and products on time and wherever our customers need them. Engagement, clear communication and dialog are key components of our efforts to be responsive to customers and employees.
